

NEWLY DECLARED LIFE SCIENCES MAJORS

Biological Sciences (BIOL BA and BIOL BS), Biochemistry & Molecular Biology (BIOC BS),
Bioinformatics & Computational Biology (BINF BS), Chemistry (CHEM BA and CHEM BS), and Chemistry Education (CHED)

The “official” list of majors is generated each Fall and Spring semester, immediately after the Schedule Adjustment Period ends (10th day of classes). If your Declaration of Major was not processed prior to that date, you will not appear on the list of majors for this semester and are considered “Newly Declared.”

“Newly Declared” majors should use this chart to determine the person they should see for advising while their Declaration/Change of Major form is being processed. Please monitor your myUMBC “Advising & Student Support” section, to ensure that your paperwork is processed correctly. Advising assignments will be made for these students in the first Fall/Spring semester in which the major is declared correctly by the end of the Schedule Adjustment period.

*BINF majors are required to complete a set of Gateway requirements before continuing on with the major. Please see the Undergraduate Catalog, the Biological Sciences Department web page (biology.umbc.edu), or the BINF major requirements sheet (available from the department) for more information.
